## Canadian Technical Report of Fisheries and Aquatic Sciences

Technical reports contain scientific and technical information that contributes to existing knowledge but which is not normally appropriate for primary literature. Technical reports are directed primarily toward a worldwide audience and have an international distribution. No restriction is placed on subject matter and the series reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries and aquatic sciences.

Technical reports may be cited as full publications. The correct citation appears above the abstract of each report. Each report is abstracted in *Aquatic Sciences and Fisheries Abstracts* and indexed in the Department's annual index to scientific and technical publications.

Numbers 1–456 in this series were issued as Technical Reports of the Fisheries Research Board of Canada. Numbers 457–714 were issued as Department of the Environment, Fisheries and Marine Service, Research and Development Directorate Technical Reports. Numbers 715–924 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Technical Reports. The current series name was changed with report number 925.

Technical reports are produced regionally but are numbered nationally. Requests for individual reports will be filled by the issuing establishment listed on the front cover and title page. Out-of-stock reports will be supplied for a fee by commercial agents.

## Rapport technique canadien des sciences halieutiques et aquatiques

Les rapports techniques contiennent des renseignements scientifiques et techniques qui constituent une contribution aux connaissances actuelles, mais qui ne sont pas normalement appropriés pour la publication dans un journal scientifique. Les rapports techniques sont destinés essentiellement à un public international et ils sont distribués à cet échelon. Il n'y a aucune restriction quant au sujet; de fait, la série reflète la vaste gamme des intérêts et des politiques du ministère des Pêches et des Océans, c'est-à-dire les sciences halieutiques et aquatiques.

Les rapports techniques peuvent être cités comme des publications complètes. Le titre exact paraît au-dessus du résumé de chaque rapport. Les rapports techniques sont résumés dans la revue *Résumés des sciences aquatiques et halieutiques*, et ils sont classés dans l'index annual des publications scientifiques et techniques du Ministère.

Les numéros 1 à 456 de cette série ont été publiés à titre de rapports techniques de l'Office des recherches sur les pêcheries du Canada. Les numéros 457 à 714 sont parus à titre de rapports techniques de la Direction générale de la recherche et du développement, Service des pêches et de la mer, ministère de l'Environnement. Les numéros 715 à 924 ont été publiés à titre de rapports techniques du Service des pêches et de la mer, ministère des Pêches et de l'Environnement. Le nom actuel de la série a été établi lors de la parution du numéro 925.

Les rapports techniques sont produits à l'échelon régional, mais numérotés à l'échelon national. Les demandes de rapports seront satisfaites par l'établissement auteur dont le nom figure sur la couverture et la page du titre. Les rapports épuisés seront fournis contre rétribution par des agents commerciaux.

## ABSTRACT

MARSHALL, K.E., M. LAYTON, and C. STOBBE. 1990. A bibliography of the lake trout, Salvelinus namaycush (Walbaum), 1984 through 1990. Can. Tech. Rep. Fish. Aquat. Sci. 1749: iv + 25 p.

This bibliography consists of some 320 references listed in alphabetical order by author. Subject and geographic indexes are provided.

Key words: bibliographies.

## RÉSUMÉ

MARSHALL, K.E., M. LAYTON, and C. STOBBE. 1990. A bibliography of the lake trout, Salvelinus namaycush (Walbaum), 1984 through 1990. Can. Tech. Rep. Fish. Aquat. Sci. 1749: iv + 25 p.

Le présente bibliographie consiste en une liste de 320 références classées par ordre alphabetique de nom d'auteurs. Elle comprend aussi un index des sujets et un index geographique.

Mots-clés: bibliographies.

## INTRODUCTION

This report is the fourth in a series of bibliographies on the lake trout. The first bibliography, covering 1929-1969 appeared in 1970 as No. 176 of this Technical Report series. The second covered 1970-77 and was issued as No. 799 in 1978. The third appeared in 1985 as report No. 1346 and covered 1977-84.

This report includes over 320 references and follows the same format as the earlier bibliographies. Although this bibliography covers mostly items published since 1984 a small number of references which were missed in the earlier reports have been included.

The main bibliography is an author index. The title of the paper is given in the language in which it is written. A note in brackets at the end of the reference indicates the language in which the paper is written if it is not in English. If the reference is to an abstract or summary of a paper presented at a conference "[abstract]" is inserted at the end of the title. At the end of each reference the terms used to index that item are listed in brackets. A geographic index lists those items about a specific area. A subject index helps users find references on broad subject topics. The indexes refer the reader to the author index by author(s) and date.

The references which make up this bibliography have been retrieved from a number of sources. The major sources are: Biological Abstracts, Aquatic Sciences and Fisheries Abstracts, the Zoological Record and Fisheries Review. Other references came from the Department of Fisheries and Oceans library database, WAVES. Some references were found while browsing through material received in the Freshwater Institute library and others were drawn to our attention by people who were aware the bibliography was being compiled.

The references have been organized using ProCite software (Personal Bibliographic Software, Inc., P.O. Box 4250, Ann Arbor, Michigan, 48106). If a formatted 5¼" floppy diskette is sent to the senior author a copy of the ProCite database file will be copied on to it and mailed to you.
